Presented at the Harm Reduction International Conference
2023 in Melbourne, Australia

This award is given in recognition of the bravery of the heroic civil society teams all around Ukraine who, from the very beginning of the Russian full-scale invasion, supported people using drugs with very extended harm reduction services, including evacuation from the most dangerous sites, provision of accommodation and shelter, psychological and para-legal support, basic medical care, food, and supplies for children to people using drugs and their families.
